

## **4.14 UNAVOIDABLE ADVERSE EFFECTS**

### **WATER RESOURCES**

#### ***ALTERNATIVE D – ENDERTS BEACH DEVELOPMENT***

Potential impacts of Alternative D on surface water hydrology are considered significant. The small size of the Enderts Beach parcel and its proximity to the Pacific Ocean indicate that potential impacts may not be mitigated to less than significant levels.

### **BIOLOGICAL RESOURCES**

#### ***ALTERNATIVE D – ENDERTS BEACH DEVELOPMENT***

Potential impacts of Alternative D on biological resources are considered significant. The small size of the Enderts Beach parcel, the high quality of its marsh and riparian forest, and its proximity to the Pacific Ocean indicate that potential impacts may not be mitigated to less than significant levels.
